AGILITY AND INNOVATION

ARE YOU WELL PLATFORM HELPS COMPANIES GET BACK TO WORK.
Engineered to get Back to Work.

The Altran *Are You Well* multisided platform is engineered to help everyone get back to work with a sense of assurance.

The *Are You Well* platform can mobilize people in a variety of scenarios and industries. At its heart, it allows users - patients, employees, and students - to input data and then connect to experts who can advise on next steps.

Among its many use-cases, it can connect patients with healthcare providers to enable better health outcomes, students with faculty to enable in-person learning and employees with employers to get the economy moving again.
Engineered for multiple use-cases

Adaptable and extensible for a variety of use-cases
Uses AI and ML for streamlined decision-making and data filtering
Easily configurable and scalable
Integrates with wearable devices
Compliant for regulatory environments
Uses integrated cloud, analytics and chat bot for agile development

Engineered for regulatory environments

Altran teams have a long history of knowing how to create applications that work in regulatory environments. The Are You Well platform enables companies to map data for relevant use cases and apply regulatory controls as needed, whether that involves HIPPA-compliance, school administration compliance or HR management controls. Using AI and ML for the backend facilitates yes/no decision trees and filters necessary information for each recipient.
Engineered for Healthcare

Allows healthcare providers to monitor patients and advise on next steps to provide a sense of normalcy and safety during our ongoing pandemic.

User data could include temperature, location, symptoms, physical activity, heart rate and blood pressure of users, to provide healthcare monitoring during the current pandemic and crisis.

Engineered for the Workplace

Allows companies to implement their business processes while keeping individuals safe at home.

Gives employees peace of mind, knowing whether they are safe to go to work.

Data is anonymized before going to HR, and provides only top-level advisory information, to comply with employee contracts and HR regulatory agreements.
Engineered for Education

Allows schools to re-open while providing safe and clear guidance for students and administration alike.

Enables in-person learning while minimizing risks to school administration and students.

Engineered for Drug Research

Allows drug researchers to stay connected remotely and safely while providing guidance to drug trial participants.

Enables trial participants at every stage of wellness to stay connected to researchers throughout trials.

Engineered for Medtech

Uses integrated cloud, analytics and chat bot for accelerated, agile development.

Enables healthcare data to work smarter by integrating mobile software onto wearable devices.
The *Are You Well* platform is adaptable and extensible for a multitude of use-cases.

Highly scalable with an ease of configurability, it’s engineered to integrate with existing platforms and wearable devices. Developed to be compliant for regulatory environments, AI and ML is deployed to streamline decision-making and information filtering. It utilizes an integrated cloud, analytics and chat bot package for agile development.

Engineered to connect individuals with experts, it can provide peace of mind for healthcare systems, educational programs, as well as employers and employees in multiple industries.
Altran is the world leader in engineering and R&D services. Altran offers its clients a unique value proposition to meet their transformation and innovation challenges. Altran supports its clients, from concept through industrialization, to develop the products and services of tomorrow and has been working for more than 35 years with major players in many sectors: Automotive, Aeronautics, Space, Defense & Naval, Rail, Infrastructure & Transport, Energy, Industrial & Consumer, Life Sciences, Communications, Semiconductor & Electronics, Software & Internet, Finance & Public Sector.
